

Coimbra Wrapup

FIG Commission 7 Annual Meeting

Christiaan Lemmen
October, 27th 2016

Annual Meeting 2016

- Opening
- Working Groups
- Country Reports
- Breakout
- Curriculum
- Knowledge base
- Cadastre 4.0 – Geo Conference

Developments are similar

- More Cooperation
- More Geo-ICT
- More Geo-Information
- More Data Integration
- More Land Administration
- More Land Administrators

We all started in a FFP approach

Try – Test – Develop

DEVELOP IT

Sustainable development

Land Administration

Bridge the Gap

Between developed and developing world

Bridge the Gap

Between land administrators – politicians

Bridge the Gap

Between surveyors and surveyors

MORE Work for Surveyors

UN GGIM Integration of Worlds

These geospatial variables can be inputs into consolidated indicators....
and provide sources of new data to support national decision-making

- Population
- Human settlement
- Infrastructure
- Rainfall
- Temperature
- Land use/cover
- Topography
- Vegetation
- Surface water
- Groundwater
- Soils
- Elevation
- Imagery
- Earth observations

Transforming our World: The 2030 Agenda for Sustainable Development

Follow up and review:

76. We will support developing countries, particularly African countries, LDCs, SIDS and LLDCs, in strengthening the capacity of national statistical offices and data systems to ensure access to high quality, timely, reliable and disaggregated data.

We will promote transparent and accountable scaling-up of appropriate public-private cooperation to exploit the contribution to be made by a wide range of data, *including earth observation and geospatial information*, while ensuring national ownership in supporting and tracking progress.
